14. **How will the project stimulate economic development within the community?**

By providing the City with greater access to population data about our community, this project will enhance our ability to do more effective tourism marketing and increase our ability to attract tourists. In addition this project will give us a much better understanding of the demand for future workforce housing, policing, transportation infrastructure, sanitation infrastructure, parking and lifestyle amenities, etc. all of which have significant impact on our ability to sustain and attract new development.

Of particular note, the communities ability to attract workforce (and in turn sustain economic growth) has become significantly impacted by our ability to provide workforce housing. Having accurate data about our temporary workforce is essential to being able to plan future housing projects and in turn attract and retain future workforce.

15. **Details of community support for objectives:**

- In addition to \$15,000 of City of Revelstoke funds allocated by Engineering Services, Development Service and Community Economic Development, The Revelstoke Accommodation Association has agreed to provide up to \$35,000 and Columbia Basin Trust has indicated that they will provide \$20,000 for this project.
