* ATTENTION : CSRD

To whom it may concern,

- Please be advised that I have no information about this development with regards to proposed location of infrastructure and septic/drainage systems.
- At a meeting in Fieldland regarding a proposed development at this same site years ago, I stated, acting on advice from my lawyer that the provincial law states that no development or installation of septic systems/drainage can take place within 300 meters of an existing well system.
- My well/drinking water is approximately 75 meters from the proposed development site. Myself and my neighbor [REDACTED] are on the same aquifer and have been for 26 years. Our water is pristine by provincial water analysis.
- Development at that time aforementioned was turned down, and has been re-submitted in a different format now.
- I require a full disclosure of locations of septic systems, drainage, and possible seepage of pollutants, as well as a full legal guarantee by architects/geographical engineers that this development will NOT endanger or encroach my drinking water in any way, shape or form. I also want a written guarantee of responsibility from the district that this will not take place. I have been in contact with my lawyer with regards to this, and will follow his direction.

PL2016-0145

- Thank you for your attention to my concerns.

Respectfully,
