Notes:			PlayFullScreen allows bookmarking so public are able to easily view footage from individual agenda items. PlayFullScreen data servers are hosted in Vancouver. Council meeting videos are generally not posted to YouTube (unless it's been curated, i.e. budget highlights).		Sicamous looked into this but determined the acoustics of council chambers would need to be improved. Also concerned about iCompass YouTube plug-in re: Patriot Act.			Meeting recording/ streaming was proposed by a director in April 2019 but the motion was defeated by the Board.
