Re: Sicamous Recycling Depot Location

To the Columbia Shuswap Regional District Board,

The Council of the District of Sicamous, formally requests that the Sicamous recycling services be returned to the previously agreed to location of 1133 Eagle Pass Way, at the Parkland Mall. We do not support locating recycling facilities in our downtown core, as it contravenes section 8.5.3 of our Official Community Plan (attached), as it compromises beautification efforts to our downtown core. The most convenient and accessible location for the recycling services in our opinion, is at 1133 Eagle Pass Way, the Parkland Mall.

Regards,

DISTRICT OF SICAMOUS

8.4 Storm Drainage

- 8.4.1. Commercial and industrial parking lots will require oil interceptors in storm drains in order to mitigate contamination of water sources. The existing Storm Water infrastructure is shown in Schedule I: Storm Water Drainage Infrastructure.
- 8.4.2. The District will work towards developing alternative storm water management solutions that are both cost effective and environmentally sustainable. This may include strategies to reduce and control run-off such as storm water detention ponds, limiting impervious surfaces, retaining open ditches and gravel, brick or grass sidewalks.
- 8.4.3. The District will strongly encourage measures to limit runoff into the storm sewer system and rivers and minimize the release of substances harmful to the environment. This may include the requirement of preventative measures such as implementation of an erosion and sediment control plan or treatment like storm-interceptors.
- 8.4.4. The District will co-ordinate with neighbouring jurisdictions and agencies to improve storm water management and reduce pollution and erosion.

Sicamous Landing

8.5 Solid Waste Management

- 8.5.1. The District will continue to use the CSRD landfill as the primary landfill site as required under the Columbia Shuswap Regional District Solid Waste Management Plan (SWMP). A review of this the Solid Waste Management Plan was completed in 2015 and the District of Sicamous Official Community Plan is consistent with the SWMP 2015.
- 8.5.2. The District of Sicamous will work with the CSRD towards a mutual objective of waste reduction by encouraging local initiatives for waste reduction, recycling and re-use. This may include education initiatives and a review of user fees to provide incentives to minimize waste production.
- 8.5.3. The District will redirect recycling and other waste management facilities to convenient locations without compromising community beautification efforts.
- 8.5.4. The District will support Regional and Provincial Government goals and initiatives for waste recycling, reduction and re-use.
- 8.5.5. The District will encourage the implantation of a curbside collection service for garbage/recycling as per the CSRD's SWMP 2015.
